FOXCONN AND UMC JOIN SAMSUNG AS INVESTORS IN LENSVECTOR™

Consumer Electronics Industry Leaders Back Company That Replaces Moving Parts of Camera Phones with Solid-State Optics

MOUNTAIN VIEW, Calif., Feb. 11, 2010 – [LensVector™](#), Inc., the leader in solid-state optical components for camera phones, laptops and other consumer electronics, today announced that Foxconn Technology Group and UMC have joined Samsung as investors in the company’s \$30 million Series C financing round.

Other investors joining the Series C round include TransLink Capital and Harbor Pacific. The proceeds will be used to expand LensVector operations and bring the total financial backing of the company to more than \$50 million.

“These investments are strong industry endorsements from the top players in mobile consumer electronics, and we are poised to make significant contributions to the industry with our breakthrough optical technology,” said LensVector CEO Derek Proudian.

LensVector has developed breakthrough optical technology that can shape, steer and focus light without mechanical movement. Sampling today with key customers, LensVector technology replaces the complex, bulky and often fragile mechanical autofocus mechanisms currently found in camera phones with a simple and easy-to-integrate solid-state component.
