Side by Side Optics (SSO) provides complete optical engineering services for optical product development, design and analysis. Our experience in design for manufacture will speed up the time to market for your product(s). We are happy to support you at any stage of your product cycle from new product development to improvement in existing products.

SSO's capabilities include the following services:

- Requirements development
- Optical System Design and Analysis
- Illumination System Design and Analysis
- Stray Light Analysis
- Product specifications
- Optical Metrology
- Project management and System integration
- Product trouble shooting
- Training

Our specific engineering expertise is in the field of optics including:

- Optical instrumentation
- Lenses and camera systems
- Microscopy
- Interferometry and testing
- Laser beam shaping
- Optical sensors
- Biophotonics , Agrophotonics
- Telecommunication
- Medical
- Aerospace and Defense
- and more.

We can use the most advanced software tools available including CodeV, Zemax, ASAP and NVThermIP to simulate your products to verify performance before they are manufactured, saving you time and money.

For more information, please contact Dr. Jasmin Côté ([jcote@sidebysideoptics.com](mailto:jcote@sidebysideoptics.com)) or Dr. Marie Côté ([mcote@sidebysideoptics.com](mailto:mcote@sidebysideoptics.com)).
