

## Telops Introduces the Hyper-Cam Infrared Camera Series

Telops is proud to announce that it has developed its own line of advanced Hyper-Cam Infrared Cameras.

Recognized for its innovation and expertise in hyperspectral imagery, Telops takes imaging to the next level with this unique line of infrared cameras designed specifically for the research scientist and infrared expert.

This innovative line of products includes two infrared cameras, each with its own unique features designed to provide users with an unparalleled experience. Ease of use and the ability to customize the instrument have been ingeniously integrated into the camera design.

**FAST-IR** is the **fastest infrared camera** available on the market. Being the **first 1000 fps full frame solution**, it allows unprecedented thermal imaging of dynamic events with much more temporal resolution than current market solutions.

**HD-IR** is the **first 1280 x 1024 pixel camera solution** making it the highest resolution infrared camera commercially available.

**Would you like to receive the FAST-IR or HD-IR datasheet?**
